The mission of the **Joint National Emergency Medical Services Leadership Forum** (JNEMSLF) is to facilitate a shared vision, collaboration, and unity in purpose to improve emergency medical services and conditions that affect emergency medical services throughout the country.

It is the vision of the **JNEMSLF** that timely, stable and accountable local and regional emergency medical services systems with the capacity and performance to ensure optimal patient outcomes must be available throughout the United States. The **JNEMSLF** will achieve this vision through:

- Maintaining contemporary and mutual awareness of the priorities, challenges, and accomplishments of national associations with a leadership role in emergency medical services systems in the United States
- Fostering an environment of trust and information exchange among and between national EMS associations and partners in the executive branch of the federal government
- Identifying matters of mutual importance and developing consensus-based positions for emergency medical services stakeholders and partners at the all levels – local through federal
- Serving as a collective voice for interactions with federal and national organizations when a multi-association, multidisciplinary educational approach is of benefit to all stakeholders

Letter Content Areas

- “Physicians” includes “EMS Medical Directors”
- “Providers” includes “EMS agencies”
- How are they mitigating, and how well is that working, impediments to mitigation
- Exp dates - inability for medical directors or states to authorize use
- Potency and toxicity?
- Define the problem at local, system, and state level (including escalating prices and compounding)
- Effect of changing formulations/substitute drugs is a patient and provider safety issue
- Unique nature of EMS care and the time urgency
- Liability

NEMESIS: progress and next steps

- Conference call
- Social Marketing
- Power of messages from national associations
- Value of peer-to-peer presentations (e.g., NAEMSP in January)
- Outreach to NEMESIS TAC
- HL7 is only step 1, interface of EMS data with EHRs, but this has not received a lot of attention
- If JNEMSLF feels EMS integration in the EHIE is important, communication of this would be helpful to US HHS—there are a lot of issues that haven't been thought through
- Consider bidirectional information flow and incentives
