# NASEMSO Timeline for Implementation of the EMS Education Agenda--2009

---

## Introduction

In 1996, the National Highway Traffic Safety Administration (NHTSA) and the Health Resources and Services Administration (HRSA) published the national consensus document titled *EMS Agenda for the Future (Agenda)*. The intent of the *Agenda* is to create a common vision for the future of EMS and is designed for use by government and private organizations at the national, state and local levels to help guide EMS planning, decision making, and policy including EMS education.

In 2000, the *Agenda* was followed by the [\*EMS Education Agenda for the Future: A Systems Approach \(Education Agenda\)\*](#). The purpose of the *Education Agenda* is to establish a system of EMS education that more closely parallels that of other allied health care professions. The *Education Agenda* was developed at the request of the National Association of State EMS Officials (NASEMSO) with support from the National Highway Traffic Safety Administration (NHTSA) and the Health Resources and Services Administration (HRSA.) Since the release of the *Education Agenda*, much has been accomplished. The *National EMS Core Content (Core Content)*, *National EMS Scope of Practice Model (Scope of Practice Model)*, and *National EMS Education Standards (Education Standards)* have been completed. As the professional association that represents state lead agencies for EMS, NASEMSO has taken the primary role in coordinating implementation of the EMS Education Agenda.

Because implementation will require a multifaceted, multidisciplinary approach by a variety of EMS stakeholders, this Timeline document has been created to illustrate the complexities of implementing the *Education Agenda*. It represents several milestones for implementation and identifies EMS stakeholders that have expressed an interest in participating in a range of implementation activities with a time-oriented goal for achieving them. This chart does not represent an exclusive list and additional objectives will be added as they are identified. Individual states retain the authority to determine their level of participation.

NASEMSO believes the *Education Agenda* will ensure a consistency of quality and content among EMS programs, provide career mobility for individuals who seek reciprocity among the states, and align EMS with other health professions and enhance the professional credibility of EMS practitioners.
