# NAVIGATING THE ANTI-REGULATORY ENVIRONMENT AND THE RESPONSIBILITY AND LIABILITY OF BOARD MEMBERS

OCCUPATIONAL LICENSURE POLICY WEBINAR SERIES

Wednesday, April 24, 2019 | 11 a.m.-Noon EDT

Attendees will be given a survey of the national anti-regulatory sentiments, national active supervision, and curative measures responsive to the *Federal Trade Commission v. North Carolina Dental Board* Supreme Court Decision. Attendees will also review best practices for licensing boards in the handling of: meetings, rulemaking, complaints, investigations, hearings and settlements, and communications with applicants and licensees. A discussion will also be held on interstate compacts and how to better manage scope of practice conflicts with informal procedures, memorandum of understanding, and potential judicial alternatives. These lessons will enable attendees to gain an understanding of best practices to avoid antitrust liability in the occupational licensure setting.

## PANELISTS

**Nahale Freeland Kalfas** is a solo-practitioner specializing in administrative law. For the past 11 years, she has been responsible for prosecutorial hearings, settlements, rulemaking and legislative matters as general counsel for the North

Carolina Board of Examiners for Speech and Language Pathologists and Audiologists. Kalfas also serves as a legal consultant to the National Center for Interstate Compacts for a number of interstate compact projects.

**Rick Masters** is special counsel to the National Center for Interstate Compacts (NCIC), affiliated with the Council of State Governments, providing legal guidance on the law and use of interstate compacts and their application and enforcement, and bill drafting guidance in conjunction with

the various NCIC compact projects. He has been a primary drafter of many compacts including multistate licensure compacts for the professions of nursing, medicine, physical therapy, emergency medical services and psychology.
