

Agency & Vehicle Licensure Committee

The **Agency & Vehicle Licensure Committee** of the National Association of State EMS Officials is committed to identification of standards and promising practices related to states' local EMS agency licensure, and the development of models for states' use in their regulatory practices related to local EMS agency licensure.

Agency & Vehicle Licensure Committee

Leadership

The AVL Committee supports leadership under these principle goals:

-  **Goal #1:** develop model regulatory language for state adoption related to the design of ambulances for state promulgation as needed
-  **Goal #2:** Identification of standards and promising practices related to states' local EMS agency licensure

AVL Committee

Systems Development

The AVL Committee supports systems development under these principle goals:

-  **Goal #3:** Identification of state practices related to education and certification of state EMS employees or contractors with licensure related duties in areas such as investigations or regulatory practices (i.e., how do state EMS offices prepare their employees or contractors to perform inspection or investigation related duties related to agency licensure?).
-  **Goal #4:** Identification of state practices related to complaint management, investigations, sanctions, and administrative actions related to EMS agency licensure and proposed approaches to standardization.

AVL Committee

Quality Improvement – “QI”

The AVL Committee will undertake support of performance improvement after structure and process goals are accomplished and baseline practices and outcomes are determined.

AVL Committee

The AVL Committee 2013 work plan will focus on the following issues:

-  **Issue #1:** Anticipated Retirement of the GSA KKK Specifications – To develop model regulatory language for state adoption related to the design of ambulances, and identify options for vehicle specifications to be included therein for state promulgation as needed. The primary interests driving this proposal relate to safety, cost effectiveness, and reducing state-to-state variation.
-  **Issue #2:** No NASEMSO Resources on Agency Licensure – Despite regulation of local EMS agencies being part of the legislative mandate for the majority of states, identification of standards related to states' local EMS agency licensure requirements has not historically been an association activity. This is anticipated to be a resource for states to identify common practices, promising practices, and increased standardization
