

INHALATIONS, INGESTIONS, AND POISONINGS

Question: A standardization question arose in our Trauma Quality Improvement Committee around when are inhalations, ingestions and poisonings placed into the Trauma Registry. We would like to enhance our Data Dictionary inclusion criteria with more specific information i.e. only when the Trauma Team is activated, ED consulted Trauma Surgeon, ED Response only, etc. Would you be able to send me what you have in your Trauma Registry and or the link for this?

State	Respondent	Comment	Additional Information
AZ	Rogelio Martinez, MPH	Trauma Patient Inclusion Criteria Definition (2013)	Arizona Trauma Registry Information
MM	Chris Ballard, RN	Does the patient have a primary ICD9-CM diagnosis code of: 800.00 - 959.9 987.9 (smoke inhalation) 991.0-3 (frostbite) 994.0 (lightning) 994.1 (drowning) 994.7 (strangulation) or 994.8 (electrical current)	Minnesota Trauma Registry Inclusion Criteria
NE	Sherri Wren, MPA	Our Data Dictionary is available on our website. Our inclusion criteria is listed on page 7.	Nebraska Trauma Registry Data Dictionary 2012
PA	Juliette Geiger, RN	See pages 11 and 12 for our trauma registry (PTOS) data inclusion criteria that should answer your question	Operational Manual for the Data Base Collection System (2014)
VA	Paul Sharpe, RN	We actually removed these from our registry around 2006 or 2006
