39	1013	add <i>EMS</i>
39	1017	add or change training to educate

**comment**

Pre hospital care is where health care begins in an emergency/disaster

This will ensure that there would be no delay in getting available assets to an event

This makes this statement more Inclusive

It is important that families are included in this statement

Not sure what "step" adds to this statement

We have learned from history that family pets must be included

How about considering adding some language about teaching family members on when you care for someone at home and when you call 9-1-1

Its more global to change from public health to health and management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document makes the statement more global

First response personnel should be considered a priority and separate like at risk individuals

Prioritizing first response personnel is critical in order to assure that they will be available in emergencies.

who would be the oversight body?

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document

Not sure why EMS was not included in this list

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document

its more than just training

same reasoning as above

its more than just training

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document

its more than just training

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
its more than just training
keeping this just public health is too restrictive...need to look at this more globally and more broad
its more than just training
its more than just training
its more than just training
Older citizens are also at-risk
This should include any form of businesses in the community
there is testing equipment being sold that is not reliable
Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
something that should be considered when developing incentives
Its important to educate as well as train
its more than just training
This is important so that the same message, no matter where you are is being given.
its more than just training
Its important to have current information when considering local resources
Should a Federal partner be name here so that it insured to happen?
We need to educate the public on how to take care of them self and when to enter the emergency care system
Hands only CPR is critical for all citizens to learn
its more than just training
Not sure what is being said when it states "causing undue burden" ?
EMS expertise is critical for fusion centers in order to track types and numbers of emergency calls etc.
Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
Not sure why EMS was not included in this list
its more than just training

Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
its more than just training
It is important to provide staffing guidances to ensure that needs are being met based on projection modeling systems.
its more than just training
its more than just training
its more than just training
There are many types of disasters and incidents but a consistent approach should be used
its more than just training
Its more global to change from management to services which will include PD/FD/EMS/EMS/ hospitals and others, this should happen throughout the document
These stations assist in tracking potential communicable diseases for visitors arriving in the US for oversees.
not sure what this adds to this statement
there is testing equipment being sold that is not reliable
its more than just training
