**Subject:** RE: Publicity Release Draft

Dia,

As discussed at our meeting last week, the officers of F30 copied here and I offer the following draft press release. Please feel free to share with Jim DiTienne. I will check back in about a week.

#### Publicity Release Draft

Leaders from ASTM International Committee F30 on Emergency Medical Services and the National Association of EMS Officials (NASEMSO) met in Washington, DC, Tuesday, February 4, 2014 to discuss cooperation on developing new standards for EMS as well as updating existing standards coming due for renewal. This joint commitment will support standards needed for EMS through open and transparent participation on ASTM Committee F30 by all interested stakeholders. To that end, NASEMSO has agreed to notify its members that represent diverse expertise at all levels and in all areas of EMS to invite their participation. For additional information contact Scott Orthey ([sorthey@astm.org](mailto:sorthey@astm.org)) at ASTM International, or \_\_\_\_\_ at NASEMSO. Information on joining in the work of ASTM F30 may also be found on the ASTM website at <http://www.astm.org/MEMBERSHIP/index.html>.

Thank you!

---
