Re: RFA-DTNH22-13-R-00705

Dear Review Committee,

On behalf of the National Association of State EMS Officials (NASEMSO), I am pleased to support the application from the National Association of EMS Physicians (NAEMSP) for the “National Prehospital Evidence-Based Guidelines Strategy”. The goal of this effort is to create a comprehensive written strategy for the development and implementation of evidence-based guidelines for prehospital care. I believe that NAEMSP and Dr. Christian Martin-Gill as project leader have the resources, experience, and skills to be successful in accomplishing this goal.

NAEMSP and NASEMSO have previously partnered in the development of evidence-based guidelines and position statements for prehospital care. NAEMSP has a proven track record of working with other key stakeholder organizations in collaborative projects related to clinical care and safety of prehospital care. NASEMSO has similarly collaborated with NHTSA in the creation of evidence-based guidelines and we look forward to working with NAEMSP and Dr. Martin-Gill as key stakeholders in moving forward the process of EBG development and implementation.

On behalf of the National Association of State EMS Officials, I am pleased to support NAEMSP’s application. NAEMSP is well-positioned to accomplish this challenging task and we look forward to collaborating in this process. If you have any questions, please don’t hesitate to contact me.

Sincerely,
