**Subject:** EMS Compass Measures - Continuum offering product

Good Morning Ms. Renfro,

I am the epidemiologist here at ImageTrend and I work closely with our Continuum product. Continuum provides active data monitoring alerts as well as dashboarding that is constantly being updated to allow the user to make quick actionable changes as well as monitor patient care. We create topical domains such as Stroke, Pediatric, Naloxone, CA Core Measures and more.

We would like to create a domain specific to EMS Compass measures, and would like to get permission to use the name (with the registered trademark symbol of course) within our product so that users know what these measures are associated with. If you have any questions please feel free to contact me.

Thank you,

Morgan Anderson  
Epidemiologist
