- Section I - Develop Ad Hoc Committees/Workgroups (Drowning, Injury Prevention) White Paper for Legislators, Home Safety App [Do actual work!]
- Section II - Developing a PECC Clearing House for Resources
- Section III - Improve the format and outcomes of Full Council Meetings
- Orientation for new PECC members, both written and meetings with specific Council members

In regards to NASEMSO, I'd really like to see if the QI monitor tools and resources that are being used by the PedsReady QI Collaborative can be released to states so that we can share those with our hospitals (after the collaborative is completed next year). I understand completely that these documents have needed to remain embargoed while the collaborative is in process. However, I thought that once the collaborative is completed next year, that the tools, etc would be distributed. I recently heard that nothing will be released until publications are written and published, which will minimally take a year (after the collaborative ends). So, it could be 2021 or later before these tools are released. I'm not sure how accurate this information is, but I think it might be helpful if we as NASEMSO PEC are able to advocate for the sharing of the tools once all the work of the collaborative is completed. These are really useful tools that can benefit a wider audience. Not sure what your thoughts are on this, or if you feel it would be a topic for discussion.

PEC Council Workplan

Goal: to determine at least one council project to work on between now and June.

We will send out a list for members to select preferred options for the following categories:

- A project leading to some type of deliverable, resource, or document that supports PECC Members in their daily work; used to educate or support the state EMS officials or the general EMS Community.
- Resolution development. Resolutions should be impactful, meaningful, and timely.
- An area or topic for further exploration. A topic or task that needs additional study or investigation to determine if a deliverable is needed or to establish the scope of a project.

EIIC Website - toolkit section

Contacting other PECC members
Knowing which other members are from similar programs (office of EMS, public health, University, etc.)
Eric NJ - contact for Safe Transport
Crystal, DE - offers standards document for their hospital recognition program
Dave, VA - contact for Disaster Prep
NHTSA
ASPR
HPP
Child Fatality Review (county and state teams)
Epidemiologist - state data by county maps
EMS Conferences - data, trends, new ideas
State Administrative Code, Hospital Recognition System (Kelly, Illinois)
Gail, LA, EMSC in LA is in Family Health which has led to connections that are different, including epidemiology
Pediatric Emergency Response Course (TEX Disaster)
"borrowing" resources from other states i.e. communication cards, safe transport guides, scenario book
Model from Trauma Teams - use for peds info/do debrief
Data Managers
EMS State Director
Heidi, CA - has recently enacted EMSC regulations
EMSC Advisory Committee, including physician help with hospital focused measures
Google search other state's EMS/EMSC websites/pages
R&D - rip off and duplicate, CASE - copy and steal everything
Renee, AK - Pediatric Medical Director Hotline
Phyllis Hendry, FL - FLPedReady website, weekly newsletter PEARL
In-person meetings, national and regional
NEDARC
EIIC
HRSA Project Officers
University of KY CBT.KY.EDU Community Tool Bank for planning, volunteers, policy changes
Facebook pages, EMSC Program Managers, EMSC Community
National Pediatric Disaster Readiness Committee, List Serv
interfacility Transfer Guides - Interactive guide (NRC), Kansas book, Maryland pdf/book, etc.
Rocket Book - use to save notes and pictures to "cloud", \$30 ish
