- No reports

Old Business

Review of June Board Vote

- Additional Board Meeting scheduled in June for more thorough discussion of the NEMSIS timeline and v3.5 process plan. Board re-vote approved both.

NASEMSO Data Managers Council

MEETING MINUTES

July 31, 2018

NEMSIS TAC – Dr. Clay Mann

- New Naloxone Dashboard – Clay thanked this group for the input provided; State training will be held on Thursday
- Making progress on the new v3 Cube – will include new features including ZipCode US Census data attributes
 - Hope to have a demonstration during the August meeting and will provide a demo at the next DMC call
- V3 Implementation Meeting – still time to register. Meeting will include eight workgroups – participants will have the option to choose two. Workgroup background material and questions can be found [here](#). Workgroup findings will be reviewed with DMC.
- Call out for workgroup members re: CARES & NEMSIS harmonization. Pre-meeting to be held Thursday, Aug 2nd
- V3 implementation call – Doug mentioned that a support letter from NHTSA would be helpful.
 - Jeremy Kinsman indicated that the letter is in draft form and they hope it will satisfy the DMC and other state needs. It will provide details on what the benefits of v3 are and will highlight the new timeline.
ACTION: If there are other things that would be valuable, reach out to Jeremy.
- There have been about 35 applicants for Karen’s position. The University of Utah advised that all local applicants must be exhausted first before looking at those who would need to telecommute. Second round of interviews will start next week. Would like to have the position filled before August meeting.
- Clay reviewed the new timeline, which can be found [here](#).

NHTSA OEMS – Jeremy Kinsman

Both Jeremy and Dr. Krohmer will be at the August NEMSIS meeting and they are looking forward to the 1:1 time with those present – looking to learn what is working and not working, as well as the best way to move forward. Strategies and next steps are important, your input is important.

Other Business

Chip Cooper: CMS has put out a draft of proposed templates for non-emergency transport, which is in a public comment period. Identified “suggested clinical data elements” but there is no mention of NEMSIS

ACTION: Chip will send out the information to the Data Managers for review and comment
