COUNCIL MEETING AGENDA

HITS Committee update: Billie Collier (MS)

HITS met on Feb. 13th. There was a presentation by Clay Mann on the Universal Unique Identifiers (UUID). Dia had suggested at the Dec meeting that HITS get involved and encouraged the usefulness of UUID with NEMSIS TAC. He explained how UUID links de-identified data records such as EMS & Hospital (specifically Trauma) data.

They also talked about the updating of EMS education standards stating that NASEMSE was talking with Co-A on accrediting EMT schools like the Paramedic schools. There was quite a bit of discussion on this.

NHTSA representative stated that the NEMSIS v3 data is really interesting.

Nothing was discussed specific to pediatrics. I did let them know that it sounds like UUID piece would be great for capturing pediatric data and is something I think would work well for all of us.
