

**Just-in-Time Training Options for State EMS Officials**  
**NASEMSO Fall Meeting**

Joint Session of the Medical Directors Council, Education and Professional Services Council and Domestic Preparedness Committee

**September 20, 2016**

**Hyatt Regency Albuquerque, NM**  
**Pavilion VI**

Within the EMS Community there is wide variation in mechanisms for delivering just-in-time training, alerts, or updates, to their practitioners when rapidly emerging issues are unfolding such as the Opioid Overdose Epidemic, Ebola Virus Disease, Flu, changes in MCI Triage.

1:00 – 1:15

**Welcome, Opening Remarks, Introductions**

- Kandra Strauss-Riggs – NCDMPH
- Gam Wijetunge – DOT, NHTSA

1:15 – 2:00

**Discussion with states on use of LMS to deliver training**

Guiding Questions for States:

- What protocols (if any) are in place, training provided, software used?
- For those states not using an LMS, what are the top three barriers to use?
- For those using an LMS, what is your content development process for what goes into it?
- In an emerging event, how would you modify this process?
- Is there a need to develop a platform for states to build from?
- How can States and national partners ensure coordination of quality EMS content in LMS?
