

### Q3 Is there another project you expected to see on this list?

Answered: 4 Skipped: 29

#	RESPONSES	DATE
1	No	4/4/2018 3:39 PM
2	New models of EMS Care Delivery	4/2/2018 12:19 PM
3	Comments on above: Of the ones marked, my top vote is for NEMSIS dashboard assets. Others should have another round of input if selected to narrow the project, e.g., next evidence-based guideline.	4/2/2018 11:23 AM
4	1. National-level research paper on EMS funding, including advocacy for sufficient reimbursement from insurance (Medicare, Medicaid, Private Insurance, Self-Pay), the express need for government subsidy, and novel funding methodologies. 2. National-level research paper on creating 21st Century categorization, prioritization, and dispatch systems (e.g., MPDS), including the use of diversion to primary care, alternative response strategies, and real time intelligent systems that modify categories based on historical geo-temporal data. 3. Research on 21st Century charting methodologies, including audio & video recording, which shorten ambulance cycle time.	4/2/2018 11:10 AM
