- b. State EMS Investigator Instructional Guidelines and Resources Document (Kevin) Needs to be cleaned up and refined for publication and use. Should be finalized before next meeting.
 - c. Should there be a code of conduct for EMS? (Curt Schreckengaust) Does PLC have a role in establishing a NASEMSO licensure code of conduct. Do we need to do something? The existence of the [NAEMT Code of Ethics and EMT Oath](#) was discussed and it was consensus that this is not a priority given this other work.
 - d. Nomenclature Project
Been a subject of discussion and debate and is a topic for the National EMS Advisory Council. More of an evolutionary process not revolutionary. If you have any positions or information you would like to share please contact Chair Jamie Gray, otherwise we will take this off the agenda.

High school based educational programs were discussed.
Discussion of a survey of NREMT going paperless for issuance of electronic certification. Most meeting participants that were involved in the discussion did not have identified issues with the proposal. Ray Mollers from NREMT will attempt to provide the survey to PLC membership.
