Subject: [datamanagers] 2015 NEMSIS TAC Activities!

NASEMSO DataManagers List -

Greetings from the NEMSIS Technical Assistance Center!

Every year the NEMSIS Technical Assistance Center holds a retreat, during which, we attempt to identify activities for the coming year and set timelines associated with those activities. No doubt there is much to do as we begin rolling out NEMSIS Version 3 in earnest!

I am writing to ask if you have thoughts regarding any needed products, training or processes you feel the NEMSIS TAC should address this year. We want to ensure that our efforts have maximum impact, providing meaningful tools that facilitate the migration to V3 and ensure that the collected data are clean and result in reporting that is “actionable”.

Please feel free to pass along any thoughts you might have in the next two weeks. Thank you for your continued support of the NEMSIS program!
