

NASEMSO Trauma Managers Council

NTDB/TQIP Poll

Listserv Question: March 20, 2015

State	ACS or State Verified?	Requirement for Trauma Centers to submit to NTDB?	Who covers the cost of submission?	What are the benefits received by the state and/or Trauma Center in submission to NTDB and/or TQIP?	Other
AK	ACS – 1,2,3 State - 4	Encouraged for all	Trauma Care Fund for TC, Hospitals for non TC	National Benchmarking	
AR	State	It will be a requirement in grant deliverables.	We are currently negotiating with TQIP to develop a state contract that will pay for all of our designated facilities submissions	Risk Adjusted Benchmarking	
CO	State	Level I and II	Facility	None to state, as state does not participate as a whole	State would love to see what possibilities are for state involvement but it can't cost very much!
DE	ACS L1-3 State L4	ACS requirement	Hospitals	Hospitals get ACS verified and then state designated. I do not see any NTDB reports. Not sure how helpful they are to the hospitals but I can ask them.	My sense is that the hospitals don't use the reports a whole lot but I will ask them to be sure.
IL	State designated with a home-grown registry in place before NTDB.	Hospitals not mandated to submit to NTDB; most are interested and do participate. There has not been a fee up to this point so I don't know what the new policy from ACS to charge will have on hospitals that decide to participate.	Some IL trauma centers voluntarily participate in TQIP and they pay for that on their own. Trauma centers do receive state trauma funds and can use those monies for this fee if they choose.	About 2009 this office began facilitating submission of IL data to the NTDB via element mapping which became a yearly treadmill.	We are wrapping up an RFP for a new registry and the core data elements will be consistent with NTDB so we are moving in that direction.
IN	ACS Verified	No	Trauma Centers	Utilize NTDB data to compare Indiana to National data.

State	ACS or State Verified?	Requirement for Trauma Centers to submit to NTDB?	Who covers the cost of submission?	What are the benefits received by the state and/or Trauma Center in submission to NTDB and/or TQIP?	Other
KS	ACS for Level I, II, III Trauma Centers. State designated for Level IV.	Level I, II, III trauma centers only.	Hospitals.	Benefits for state: Hospitals get more training from TQIP and data validity is stressed. Benefits for hospital: Requirement for verification from ACS. Reports and education they receive.	
KY	ACS Levels 1-3 State Level-4	Yes	Trauma Centers	Very little that I can see after 10 yrs. at this.	Some participating in TQIP have questioned the cost of membership/participation vs the return.
MD	State Verified; PARC, L1, L2, L3, & Peds Trauma	Some have been submitting to NTDB for years. Beginning 1/1/15 all submit as a part of the MD EMS Plan.	Trauma Centers. As of 3/15 NTDB has informed the TC's that there is a submission charge \$1500 for L1 & L2 and \$500 for L3	The Trauma Centers receive a report from NTDB; the state receives nothing nor is able to receive state information. There is only 1 MD TC who submits to TQIP. Another dropped submission in 2014 due to cost and lack of ROI.	TQIP can be obtained by the state for \$15,000/year. The Trauma Centers submitting are charged \$10,500/Yr.
MS	State verified	No requirement for Trauma Centers to submit to NTDB – voluntary.	Trauma Centers covers cost of submission		
MT	Both: Voluntary system. Most Level II's and III's also choose to be ACS verified.	Yes: Level II's and III's not our small IV's and V's	Individual Centers	Benchmarking & data comparison	

NASEMSO Trauma Managers Council

State	ACS or State Verified?	Requirement for Trauma Centers to submit to NTDB?	Who covers the cost of submission?	What are the benefits received by the state and/or Trauma Center in submission to NTDB and/or TQIP?	Other
NE	ASC & State Designated	ACS facilities that are also state designated are required to submit to NTDB.	The ACS Verified Trauma Center pay this fee , not the State	Identification of trends, benchmarking and report writing.	
NY	ACS	Yes	Each facility.	State data now nationally comparable; TQIP facilities feel this has improved care	
NC	All state, some also ACS	Not currently, but will be when our rules change Jan 2016	Hospitals will	None for the State. National benchmarking benefit for centers	
ND	Level I, II and III ACS verified Level IV and V – State verified	The Level I, II and III facilities submit data to the NTDB; Level IV and V do not	The facilities that submit are responsible for the expenses involved with submission	No benefits to state. No facilities within our state currently participate within TQIP due to costs involved	
OR	Both	No, but they are required to report to the state	The trauma centers cover cost to submit for participating centers	We are working to meet the 2015 national data standards (working on a trauma registry update) allowing for local and national performance measures	Oregon also has specific PI indicators for the state
PA	State for all levels	Yes – at least currently. This could potentially change.	Trauma Centers	We are querying the trauma centers on this currently. Will have more info in April.	
SD		Level II and III centers in the state submit to the College; we do not require any of our Level IV or V's to submit data to NTDB/TQIP.			
TN	STATE	NO	NA	NOTTA	

NASEMSO Trauma Managers Council

State	ACS or State Verified?	Requirement for Trauma Centers to submit to NTDB?	Who covers the cost of submission?	What are the benefits received by the state and/or Trauma Center in submission to NTDB and/or TQIP?	Other
UT	Both	If ACS verified	Trauma Centers	Feedback data to trauma centers/comparison with like centers	State does not submit data to NTDB
VA	State	Pediatric only, none as yet	Facility	?	Our new guidelines were just approved yesterday and we are requiring that the Pediatric designated facilities report but we don't have any Peds centers yet.
WA	State	Not currently required, but some facilities voluntarily choose to do Level I, II and III ACS verified Level IV and V – State verified or so.	The facilities that choose to participate cover the costs. Currently Washington has approximately 8-10 of our 83 designated trauma hospitals submitting to NTDB	The facilities benefit by being able to obtain benchmarking data. State None. Facility receives data and benchmarks in return for NTDB submission.	From what I understand, Washington is currently upgrading to V5 collector software. Supposedly it is going to be an easier interface for those who wish to include components that are submitted to NTDB. For more information on this you can email Level I,II and III - ACS verified and State Designated Level IV - State verified and designated
WV	Level I,II and III - ACS verified and State Designated Level IV - State verified and designated	Level I, II and III as per ACS requirements. Not required for Level IV facilities	NTDB submission cost for NTDB submission for ACS facilities \$0. It appears that the individual facilities working toward Level III will have to pay for NTDB submission until ACS verified. Participation with TQIP is at the cost of the facility.	We do not submit data to NTDB as a state therefore we do not get an NTDB state report. Facilities have NTDB benchmarking capability from participating in both NTDB and TQIP.	West Virginia does not pay for NTDB submission or TQIP participation. The state does assure our WV 123 Collector is compatible with NTDB submission.
